Types of contributions
Before RHEL 9 GA it was relatively easy to land changes
Bug Fixes
“Stable” updates from upstream
Backported features
ABI-incompatible rebases
Docs/Manpage/Typo fixes
How can I know what state an update is in?
Information for build NetworkManager-1.39.90-1.el9

ID 24556
Package Name NetworkManager
Version 1.39.90
Release 1.el9
Epoch 1
Source git+https://gitlab.com/redhat/centos-stream/rpms/NetworkManager#2a0fd536f79e6753db68841c5e2bd46be252e6cb
Summary NetworkManager is a system service that manages network interfaces and connections based on user or automatic configuration. It supports Ethernet, Bridge, Bond, VLAN, Team, InfiniBand, Wi-Fi, mobile broadband (WWAN), PPPoE and other devices, and supports a variety of different VPN services.

c9s-gate: Waiting for RHEL Gating

c9s-candidate: Waiting for RHEL verification

c9s-pending: Ready for compose
What can I use Stream for?
To try features in development
To file bug reports and submit patches before the next RHEL minor release
For projects that build on top of RHEL and need a preview
For building in the Community Buildsystem
