Platforms Business Group

Community Business Owner

Contributions flow among all elements of the ecosystem; however, there is a stronger connection between CentOS Stream and Red Hat® Enterprise Linux®. They each contribute to the other while also ensuring that new code is submitted as far upstream as possible; and, ideally, directly into the relevant open source community projects.

What does Red Hat want?

Why CentOS Stream

Provide a path to
influence future RHEL
minor releases

Provide a path to

HyperScale SIG

What does Red Hat want?

- ▶ Build a solid community of contributors.
- ▶ Do cool things, even when they don't directly interest us.
- ▶ Be a positive influence on projects further upstream.
- ▶ Help us create RHEL.
- ▶ When my colleagues show up with contributions and ideas, treat them like you would any community member.
- ▶ Define your own success and goals and do them too.
